I am running for the position of Vice Chair #2. I bring a knowledge base that will greatly benefit the Benton County Democratic party. First, I have been involved in local politics in the area for many years. My activism and community participation spans decades. I am passionate about improving the place I live and helping others succeed in making our home a better place.

My top issues are safety, community, environment, and health. I currently serve as an elected Precinct Committee Officer and a Community at Large member of the Hanford Advisory Board.

I bring a super power to this position as well. I have cultivated a lifetime of involvement with local organizations and have a long memory of local officials I have served with. I make sure that I meet and become acquainted with all local leaders and maintain relationships with those that are in the know.

I am very willing to help folks to run for office and influence policies that will benefit our area. I have traveled to Olympia several times to lobby for funding for education and arts. I have made remote testimony to advocate for mental health and preschool for all to our state Senators and Legislators.

I will continue to speak truth to power and have the time and energy to give to this organization.

We need to have a great team to grow the Democratic party in our area; I would be an effective and enthusiastic team member.
